"I don't have definite plans for when I graduate. I know I'm going to take a year or two to collect myself, and then I'll start graduate school. I want to spend some time in Mexico - maybe go to school there. Eventually I'd like to get my doctorate and teach history at the college level. I'd also like to do some work in Latin America; helping to educate women there in order to improve their situation. Mostly, I just want to be happy, and feel like I am accomplishing something worthwhile."

The (Harry S. Truman) scholarship reaffirmed for me that I do want to have a career in public service. The leadership week I attended last summer was a great experince because I met others who were equally committed, if not more, to the field. For my graduate studies, I intend to focus on urban affairs because the domestic situation in this country is being greatly neglected. As I reflect back on my four years, I have learned that involvement is good, but it is a matter of how you invest your time. My advice to all current and future S.U. students: only say yes to those organizations that truly matter to you.

During the summer of 1990, under the auspices of the Woodrow Wilson National Fellowship Foundations, I participated in the Woodrow Wilson Program in Public Policy and International Studies at the University of Michigan. At the Institute of Public Policy Studies, I took courses which ameliorated my analytical, quantitative, and communication skills. Upon successful completion of the program, I earned a graduate fellowship to pursue my master's degree in public policy or international affairs as a Woodrow Wilson Fellow.

"Even though Southwestern is a small school, I got as much out of it as I would have at a large school. I know I want to paint for the rest of my life. You get into it so much...that's all you want to do. My goal is to do 'something'. I want to do something to make enough to buy paints - that's it."

He emphasizes that it is important for each individual to 'know thyself'. "It is important to do things right for you and be honest with yourself." Ask him though,"How's it going?" If given that golden opportunity to do anything at least once, what did Jeff reply? "I would like to be a pro baseball player...for the Pirates." While awaiting that chance, though, Jeff likes to collect subway tickets. Unsual? Of course not. He has metro tickets from different places such as Belgium, Washington, D.C., even Paris. But watch out. One day these items will be antique collectibles!

I have always wanted to become a doctor. The excitement of helping others sends chills down my spine. My profound thought from college is to never take anything or anyone for granted. I realize how much my family meant to me once I was away from them. They have always been my biggest fan club and supporters. I especially thank my brother who always gave me the extra push and encouraging words that I needed. I miss and will always love you, Jaysn!

"I leave SU with memories that will stay in my heart forever. The baseball team has been a family to me and the players are my brothers. I cannot even place value on the lessons from Coach Mallon, Coach Ellison, and Coach Sheldon. To them I am forever in debt. The faculty has been exceptional and have bent themselves backwards in all endeavors of my scholastic career. John Lind has been my academic confidant, but more importantly, he has been my friend. He exceeds all aspects of his job. Finally, a warm and special thanks to the Financial Aid Office-they kept me in school. And to all. . . PEACE."

"...Something international..I want to do something with this international studies major...the best experience I got out of SU was being an RA. I learned a whole lot. I got to know and work with some really neat people. I loved it...Another great experience was Tri-Delta. Being in a sorority taught me a lot too. It was a great group of people, we had a lot of fun, and I thought, high ideals...SU feels like home. I felt like I was educated in the classroom, the residence halls, and definitely from all those crazy meetings! Oh! and I'm a real Francofile. I love this French stuff, I'll probably want to do something with that."

By adding a little bit of math, chemistry, and physics, Paul finds that one can truly get an appreciation for the science because it provides a "general overhead and interaction." He hopes to become a doctor and teach chemistry at a school similar to SU. The atmoshpere of Southwestern is so 'unique'. If given the opportunity to do something at least once, though, Paul doesn't want to invent the next airplane to the moon. At SU, I feel that I have gotten both the academic and personal side to my field. Dr. Villa really helped in fostering a respect for medicine while the personable atmosphere created by the students gave me a better understanding of people. "I thought coming to a school like Southwestern, where I would be in the definite minority as a person of color, I would lose my ties to my culture and ethnicity. But that didn't happen. I am more aware now than ever before. One thing I did discover was the importance people put on labels. Am I Chicana, Hispanic, Latina, or a Mexican-American? MASK & WIG

Mask & Wig is the group responsible for the dramatic productions during the year. This year, the Mask & Wig Theatre Season included Bus Stop, The Lady From Maxims (with guest artist Eddie Mekka-Carmine on Laverne & Shirley), Guys and Dolls, and A Texas Holiday.

The cast of The Lady From Maxims ends their performance with a comedic encore.

It's not all acting! The technical part of theatre is just as important to know.

Once again, the Shrimp, Missy Delay, strikes again. This time, she tries to seduce Dr. Petypon, Scott Cox, in The Lady From Maxims.

I really thought that the orange fences were an added plus. Without them, people driving would have passed right by us without noticing!

Affirmative Action Initiated Heated Debate at Southwestern

It was more than just students vs. students, faculty, staff and administration were debating over affirmative action and Southwestern University's policy on scholarships based on race. The topic, however, reached beyond Southwestern as well.

It began with a poster that the College Republicans presented during Organization's Fair. The poster read "Smash Apartheid on Campus," and was distributed by the Young American Foundation.

After reading the poster, the Dean of Students commented negatively on it.

The incident caused the issue of affirmative action to arise, and tension between many groups, particularly between the College Republicans and the Dean of Students began.

For certain reasons, some students from the University of Texas became interested in the debate brewing in Southwestern. An article was written by the editor-in-chief of the *University Review*, an Austin journal on student opinion.

The basic idea of the article was that administrators should not tell students how to think.

From the viewpoint of the Southwestern community, the article was greatly exaggerated. Many students expressed that UT students had no right getting involved in the politics of another school.

A public debate was finally organized between Dinesh D'Souza and

The issue of affirmative action began to die down after the public debate was presented. •

Women's Volleyball Team Makes it Big for the Sixth Time!

Once again, the S.U. women's volleyball team took their sixth consecutive trip to NAIA Nationals. Whith a victory over Tarleton State the Lady Bucs become the bidistrict champions. The team then traveled to Ft. Hays, Kansas. •

Construction Welcomes Students Back to S.U.

Students were welcomed back by friendly bulldozers,a new Mabee parking lot (although the parking lot caused students to be frustrated since the new lot was primarily for those working in the fine arts building), orange fences, creaking boardwalks, and the all-confusing question of:"Where's the fountain?"

Plans were underway for the development of the academic mall and the construction of a new addition to the fine arts building.

The purpose of such a plan? First, it fulfilled the mission of Vision 2000. Second, it intended to further enhance larger programs which could now be held in the newly-constructed fine arts theatre. Third, it hoped to create a central place where the campus community could interact. Fourth, it would create a Fiber Optics Network System which would link different departments of the school together, thus improving communication. Fifth, it would build a fountain that would fit the aesthetic beauty of the campus. Sixth, it would allow students to eat meals later (since meal times were extended to accomodate the construction inconvenience). Seventh, it gave students sounds to listen to throughout the day.

The results of the plan? Noone knows, but we'll find out after the project stops being delayed.

Lansford Finds Human Skeleton in Construction Site

It's not everyday that one has the delightful opportunity of finding a human bone. However, Dr. Ed Lansford, chemistry professor at Southwestern University, found a complete human skeleton while sneaking through the construction site on his way to the library. Apparently, a finger was sticking out from under the ground of the original circle drive. Curious and anious, Lansford quickly uncovered a skeleton that appears to have been dated back to 1841. Details of the now uncovered person has not yet been released to the public.

University officials feared an ancient burial ground for students and ordered that the entire inner courtyard of the

the campus to be completely demolished. Although prolonging the academic mall construction that had already started in August, other skeletal bones were not found.

Protest Against Styrofoam Now!

Some environmentally concerned students at S.U. spoke out against Marriott's (the food service) use of styrofoam.

In turn, Marriott tried to find other alternatives to styrofoam, but found no plant that would recycle polysterene in Texas. However, Marriott assured that it would promote other means that would help save the enviroment.

Manhattan String Quartet Performs Live at Southwestern

The internationally known and recognized Manhattan String Quartet took their act to the small campus of Southwestern, located in Georgetown, Tx, 30 miles north of Austin. The quartet is known for its chamber music and, especially, for its Dmitri Shostakovich cycle.

The members are Judith Glyde, cello; Eric Lewis, first violin; John Dexter, viola; and Roy Lews, second violin. They have toured through the U.S., Europe, Mexico, and the Soviet Union.

Silicon Breast Implants are Suspected to have Serious Health Hazards

After being sold on the market for 30 years, the silicon breast implants are now being questioned. Although females desire to have such implants for various reasons, some health professionals state that the ladies safety had never been considered.

Women who have had the implants have complained of pain and discomfort that is caused by the internal scar tissue. In addition, deformities may occur when the silicon gel ruptures or shifts.

Due to such problems, the Food & Drug Administration has called for continued testing on the implants. However, the administration also allowed the implants to stay on the market.

Killeen Residents Witness One of the Most Gruesome Murders in History

23 Killed

It was the worst mass murder of the year and in history. It left a small city devastated with horror.

Killeen,Texas is located about 45 miles north of Georgetown. It houses Ft. Hood, an army base,a rather competitive high school football team, and beautiful sceneries along its outskirts. However, a gunman charged into a Luby's Cafeteria during the lunch hour disrupting the community. The incident ended with 23 people killed.

The man drove his truck into the glass window of Luby's, and used two semiautomatic pistols to shoot mercilessly at the customers-shooting them on the head or chest point blank. He yelled, "This is what Bell County did to me.This is payback day!" One woman tried to hide in a freezer. A young man hid in the dishwasher. After 10 minutes of horror, the gunman shot himself in the head.

The gunman was George Hennard (35) who was an unemployed seaman, hated women, and had a fanatic love for mass murders. He used to be a merchant marine, but was dismissed after being found with marijuana. His intention for the crime is unclear...

Underdogs of the Season

Both the Twins and Braves have risen from the worst in their leagues to the best. The Minnesota Twins were last in the American League West in 1990 and the Atlanta Braves were last in the National League West for three seasons. The secret of success for both teams lies in their strategy of signing players to the team.

The Braves found new talent in Steve Avery, David Justice and John Smoltz. The Twins traded Frank Viola to the Mets and gained three promising pitchers. Both of the teams also found some middle-income free agents. Atlanta aquired Terry Pendletan and Minnesota ran into Jack Morris and Chili Davis. And as the story goes, both the Twins and Braves came out on top.

Magic Johnson Tested HIV-Positive

With a very unexpected announcement, Magic Johnson confronted the press and announced that he tested HIV positive. Magic stated that he has never performed homosexual acts and that the virus was contracted from heterosexual acts.

It has been reported that this epidemic made its presence known by sweeping across the U.S. in three different ways.

The first wave found its origin within the population of homosexual males. The deaths caused by this type of activity have now leveled off. However, the deaths brought about by the second source have not yet reached its peak. This wave found its origin among IV-drug users. The third and latest wave hit hard among heterosexual males and females.

Magic is now trying to inform both teens and young adults of the precautions that can be taken which sharply reduce-or eliminate-the risks involved. It is important to remember that heterosexual transmission of the AIDS virus is the rule, not exception.

Texas weather is so crazy. Students left for Christmas Break wearing shorts and returned wearing rain boots. Plenty of rain and flooded areas certainly introduced the new year.

The S.U. Community Commemorates the Maker of Dr. Seuss

Many people subtly regressed into the past upon receiving news of the death of Theodore Seuss Geissel (1904-1991). Theodore Geissel was the author of the famous Dr. Seuss story books which so many of us read as children.

In memory of Mr. Geissel, students from the S.U. campus volunteered their time to read the Dr. Seuss series to visiting Montesori school children and other S.U. students. As an added feature, Marriott served green eggs and ham for those who were daring enough to take a challenge. •

Frances happily serves up green eggs and ham.

Long Days Ahead for the Economy

The stock market reached an all-time high in '91. Inflation rates were the lowest in five years. Home mortages were low since the Federal Reserve cut the discount rate. Unemployment was not as bad as the figures during the '81-'82 recession. With all of this, the U.S. stilled experienced the longest recession since the 1930's.

The slump was long and deep. 1.2 million jobs were eliminated due to layoffs. Consumer confidence low and very skeptical. This was particularly seen during the Christmas holiday when purchases are usually high. Merchants found that people were not spending as much as they used to.

Experts say that the recovery will be rather slow. Consumers are leaving the period in which borrowing-and-spending was the norm. Instead, people are becoming more aware of the need to save and invest.

The recession has caused many individuals to criticize Bush's economic performance. It appears that it is the worst performance under any postwar president.

The "I.D. Cards" Syndrome Afflicts Three Southwestern Student

Officials at Southwestern University state that the school I.D. cards are leaking some type of chemical that causes the card to stick to one's lips. Scientists claim that they have never seen anything like this before. The magnetic strips have been used for many years, and only this year has this strange phenomenon occurred. Three students have already experience the so-called "I.D. Card" Syndrome, and there is a fear that a fourth might also have been affected. Due to this dreadful occurrence, the SU food service is looking into other alternatives that can be adopted. •

Scott Streitman, senior, was afflicted with the syndrome shortly after having his meal card initialized.

Not a Good Year for Ole' Clarence

From the poverty-stricken town in Georgia to Yale Law School, and, finally, to the high honor of being a Supreme Court nominee. That is Clarenc Thomas's story. He was nominated by President George Bush to fill Thurgood Marshall's seat on the Supreme Court. However, his nomination itself caused quite a bit of conflict amongst government officials.

Some individuals think that Bush nominated Thomas because he was black. However, Bush explained that Thomas was chosen because of his qualifications. The question of affirmative action, then, came into view.

Some also point to Thomas's very conservative views. Thomas strongly opposed affirmative action, and dislikes the idea of racial integration. His nomination has greatly split the involved parties.

Despite the conflicting viewpoints, it looked as if Clarence Thomas would be given the seat on the Supreme Court. However, the process was immediately halted when Anita Hill, a lawyer, suddenly came into the picture and accused Thomas of sexual harassment.

Like Thomas, Hill grew up in poverty and worked her way up. She, too, became interested in politics. At the time of her allegation against Thomas, she was a law professor at the University of Oklahoma.

Hill alleged that Thomas sexually harassed her when she was working for him. She claimed that Thomas would herass her verbally by telling her about various sex acts. He would make suggestive comments to her, all implying something about sex.

Thomas, on the other hand, denied all charges. He claimed that he and Hill had a friendly relationship.

After careful deliberation, though, the court found Thomas not guilty. •

Well, this is it-**The End. . .The Grande Finale.**

Hope you all enjoyed it!!

We tried to capture as much of the year's events as possible. If we didn't get your special event, then we're terribly sorry. However, your memory is your best yearbook (as long as you don't lose it!). If we offended anybody, well, we're sorryabout that too. It's just one of those things that happens without you realizing it.

Anyways, we wanted to thank everyone for helping out!!

1) To our wonderful and devoted friends who patiently accepted the fact that it was "deadline time " **again**!

2) To all who contributed pictures. Without ya'll, it would have been hell trying to get the *"true"* personality of each student.

3) To all whom we asked for help, especially in identifying people, in getting new ideas, or in finding motivation.

4) To everybody who had to experience the strangest things from the yearbook staff. For example, stopping you and asking you your name. Or calling your room and asking you if you knew who the person with the khaki pants was. Afterall, *you* were in the picture too!

5) And, finally, to our advisor, Tracy Bonday- de Leon. Thanks for the ideas, the patience, and , most of all, for the can of food! It kept us going during late-hours-of-the-night-right-before-the-deadline-date.

If we missed anybody, well, thank you too. Without everybody's cooperation and patience, we would have never been finished!

Good Luck in your future years!!

*It's those good times, and bad times, that we remember during our college years, and that we'll probably **never** forget. This yearbook hopes to capture those moments. Peace.*
